You're holding in your hands a Premium All Natural and Organic Plant Food . . .

We know this because we produce it. We're Master Nursery Garden Centers, a group of over 750 independent garden centers across the country, each dedicated to helping gardeners in our hometowns have Great Gardens.

Master Nursery began in the 1950's when a group of nurseries in the San Francisco Area joined together to get group buying power while remaining independent businesses. Soon they decided to produce their own products which would be "The Best Products for Home Gardeners" and that is still our credo. We use only the finest ingredients and monitor every step of production so we can give you our Unconditional Guarantee. If you are not 100% happy with this product, bring it back to the garden center where you bought it. That garden center is one of our members, but even more importantly, they are a locally owned business and a member of your community. So buy and use this product with confidence, knowing it is . . .

good for your plants and good for your community.

Product Benefits

Our Bumper Crop Natural & Organic Tomato & Vegetable Food is a blend of natural ingredients formulated for use throughout the vegetable garden as well as with soft fruits like strawberries and acceptable for use in organic production. It will contribute to even plant growth without producing excessive foliage at the expense of fruit. The additional phosphate helps to ensure the production of high quality fruits and vegetables. The calcium in our Bumper Crop Natural & Organic Tomato & Vegetable Food aids in preventing disorders like blossom end rot.

Directions for Use

For optimum results, water the area thoroughly and allow the plants to absorb the water prior to fertilizing. After applying Bumper Crop Natural & Organic Tomato & Vegetable Food, work the fertilizer gently into the soil surface and water. For best results, be sure the fertilizer is in direct contact with the soil. Do not apply near water, storm drains, or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn/garden, and sweep any product that lands on the driveway, sidewalk, or street, back onto your lawn/garden.

PLANTS TO BE FERTILIZED	WHEN AND HOW OFTEN TO APPLY	HOW MUCH TO APPLY	HOW TO USE THIS PRODUCT
New Vegetable Plantings	Prior to planting seeds or transplants.	Apply 1 ½ cups per 10 sq. ft.	Lightly cultivate into the soil and water thoroughly.
Established Vegetable Gardens	Every 4-6 weeks as needed through the growing season.	Apply 1 lb. (3 cups) for every 50 feet. For individual plants use 1 tablespoon.	Lightly cultivate into the soil and water thoroughly.
Large Plants Like Tomatoes or Corn	Feed every 30 days or as needed through the growing season until fruit begins to set.	Apply 2-4 tablespoons per plant depending on size applied to an area 12-16 inches wide.	Lightly cultivate into the soil and water thoroughly.
Container Grown Vegetables	Every 30 days or as needed through the growing season.	Apply 1 tablespoon for every six inches of pot diameter.	Lightly cultivate into the soil and water thoroughly.
